KUALA LUMPUR: The Domestic Trade and Consumer Affairs Ministry (KPDNHEP) has begun to fully utilise the Integrated Enforcement Management System (IEMS) today to conduct price checks on goods.

Minister Datuk Seri Saifuddin Nasution Ismail said through the system the enforcement of price of goods will be more structured, while the implementation of the IEMS nationwide would be done in stages.

"With this system, the previous manual implementation will be replaced with a more sophisticated electronic system with programmed tools," he said after launching the Integrated Enforcement Management System, here today.

He said the system would also reduce human error, streamline records and avoid negative perceptions that the summon amount could be manipulated.

"The system will be implemented in six states, namely the Federal Territory of Kuala Lumpur, Putrajaya, Malacca, Selangor, Perlis and Negri Sembilan and it will be implemented throughout the country in stages," he said.
